

Spring 2024 Soil Sampler and Scout

Agrimanagement is an independent crop consulting company that provides consulting services to farmers and orchardists throughout the Yakima Valley and Columbia Basin.

Each year, Agrimanagement recruits a team of seasonal scouts and samplers who are interested in the agricultural sciences of Agronomy, Soil Science, Horticulture, Viticulture, Entomology, Plant Pathology, or related fields. Our scouts are exposed to a wide variety of Pacific Northwest crops and gain practical experience in various industries of irrigated agriculture.

We are currently hiring for the position of **Spring Soil Sampler**.

Brief Job Description: Soil sampling involves visiting and walking through consigned fields with one of our supervisors using steel sampling tubes manually driven into the soil. You will use coring procedures and follow sampling patterns setup according to the company's established operating procedures. The work could be compared to driving steel posts with a steel post driver. Sampled soil will be brought back to the office.

Required Qualifications:

- Ability to walk on uneven terrain, often carrying up to 50 lbs of equipment and samples.
- Ability to work in a physically demanding outdoor environment with good physical coordination and manual dexterity
- Possess a valid driver's license with no restrictions
- Possess a minimum of a high school diploma

Preferred Qualifications:

- Experience in and around farm or orchard crop production
- Pursuing a degree in the agricultural sciences

Time Frame: Soil samplers are needed from when the ground thaws through mid-April. Similar work will also be available in the coming fall, and scouting work will be available this summer.
